PTI 4-1
Adult Choking Performance Evaluation**

Candidate's Name: _____

Percent Required to Pass: 66% (8 of 12) Objective: Emergency Care 12th edition Appendix B

Equipment Required: Adult manikin, adult bag valve masks

Read instructions to candidate

Given an adult manikin, you must assess and appropriately treat an adult determined to be a choking victim. You will be evaluated on correct treatment for both a conscious and unconscious adult.

1st Attempt		2nd Attempt		Skill Checklist
P	F	P	F	

_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

Conscious Choking Adult Victim

1. Demonstrates scene size-up
2. Recognizes and assesses a conscious choking adult
3. Correctly performs abdominal thrust
4. Verbalizes continuing abdominal thrust until either the airway is cleared or the adult becomes unconscious

_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

Unconscious Choking Adult Victim

5. Assesses level of consciousness (AVPU)
6. Demonstrates checking respiration
7. Attempts ventilation, if unsuccessful, repositions airway, attempts ventilation again
8. Initiate chest compressions (30:2)
9. Checks airway for foreign body prior to ventilation attempt
10. Attempts ventilation, repositions airway, attempts ventilation again
11. Assess for pulselessness and, initiate HPCPR if appropriate.

EMT PTI 4-6 Oxygen Administration Performance Evaluation

Candidate's Name: _____

Percent Required to Pass: 73% (16 of 22) **Objective: Emergency Care 12th edition Chapter 8, 9, 8.9-10-12 & 13; 9.10-11-13.-14-16-17-18-20-21 &22**

Equipment Required: Airway Management Trainer manikin, infant manikin, complete set of oropharyngeal and nasopharyngeal airways, oxygen cylinders, regulators, pocket mask, non-rebreather mask, nasal cannula and flow-restricted oxygen-powered ventilation device

Read instructions to candidate
<p>Given the necessary oxygen administration equipment, you must demonstrate the proper techniques for the use of each oxygen administration device. The correct sequence of administration for each of the oxygen administration devices will be assessed.</p>

1st Attempt		2nd Attempt		Skill Checklist
P	F	P	F	
_____	_____	_____	_____	<u>Performs Ventilation with the Bag Valve Mask (BVM)</u> 1. Correctly positions the BVM on the manikin's face 2. Demonstrates proper C-E technique on the mask 3. Demonstrates proper ventilation technique ensuring chest rise & fall 4. Demonstrates proper ventilation rate for rescue breathing
_____	_____	_____	_____	<u>Demonstrates Administration of Oxygen with a Nasal Cannula</u> 5. Attaches nasal cannula to regulator and sets to appropriate liter flow 6. Demonstrates proper placement of the cannula onto the manikin's face
_____	_____	_____	_____	<u>Demonstrates Administration of Oxygen with a NRB Mask</u> 7. Attaches NRB mask to regulator and sets to appropriate liter flow ensuring inflation of reservoir bag 8. Demonstrates proper placement of the cannula onto the manikin's face
_____	_____	_____	_____	<u>Demonstrates Opening an Airway</u> 9. Demonstrates proper head tilt, chin lift maneuver 10. Demonstrates proper jaw thrust maneuver 11. Demonstrates proper neutral position for Infants
_____	_____	_____	_____	<u>Insertion of Oropharyngeal Airway</u> 12. Correctly measures airway 13. Correctly inserts airway
_____	_____	_____	_____	<u>Insertion of Nasopharyngeal Airway</u> 15. Measures adjunct 16. Lubricates adjunct 17. Demonstrates proper insertion technique

Demonstrate Suctioning Techniques

_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

18. Correctly measures soft suction catheter
19. Demonstrates proper insertion and suctioning technique
20. Correctly measures rigid tip suction catheter
21. Demonstrates proper insertion and suctioning technique
22. Demonstrates proper manual suctioning technique
